

## A HEALTHY, HAPPY OLD AGE

May be promoted by those who gently cleanse the system, now and then, when in need of a laxative remedy, by taking a desertspoonful of the ever refreshing, wholesome and truly beneficial Syrup of Figs and Elixir of Senna, which is the only family laxative generally approved by the most eminent physicians, because it acts in a natural, strengthening way and warms and tones up the internal organs without weakening them. It is equally beneficial for the very young and the middle aged, as it is always efficient and free from all harmful ingredients. To get its beneficial effects it is always necessary to buy the genuine, bearing the name of the Company—California Fig Syrup Co.—plainly printed on the front of every package.

## MAY BUILD NEW PUMPING STATION

CITY COMMISSION CONSIDERING STRUCTURE TO TAKE PLACE OF OLD ONE.

TO COST ABOUT \$10,000

New Supply of Water May Be Procured From Gravel Beds up the River Must Erect Building.

The city commissioners are considering the proposition to erect a handsome new water pumping station on the site of the present structure, on the banks of the Arkansas river. The new station, as it is now planned, would be one of the largest stations in the state, as well as one of the prettiest. Gardens would be laid out around it, and the whole effect framed up so as to make the place one of the city's principal points of interest, and something that visitors could be showed with pride.

The present station will have to be enlarged, anyway, it is said, in the near future to make room for the new six million gallon pump that will be installed shortly, and it is pointed out that an entirely new station of brick and stone could be built for two or three thousand dollars more than what the necessary extension to the present building would cost.

Would Cost About \$10,000. The plans, as prepared by Water Superintendent B. H. Sands, call for a structure, the total cost of which would not exceed \$10,000 and which would be sufficiently large that to house machinery capable of pumping 20,000,000 gallons of water daily, or enough to furnish a city of 150,000. Therefore, it is pointed out, this new station would suffice for the city's needs for many years to come. The present station is below the high water level, and at times eighteen inches of water has flooded the interior of the entire building. All the present pieces of machinery in the station is set a foot and a half above the floor level so as to be above the high water flood times.

As to Arrangements. The new station would be 100 by 82 feet in outside dimensions. The present four million gallon pump would not have to be changed from its present location. The new six million gallons pump that has been ordered would be set along side of it, and there is space left for a vertical pump of ten million gallons capacity in the same room. The interior of the structure would be so arranged that an engineer could stand in any part of the room and be within easy reach of any of the machinery.

Water From Sand Beds. The recent test wells, sunk in the sand about a mile from the present intake pipe, proved so successful that the city will shortly begin laying a line to that point and the water will be pumped to the station from these sand beds, which are not in the river channel. The new arrangement would simply give a more abundant supply, it is thought, and the water would be much purer and clearer, the grade of sand in the new location being of a better filtering variety and the gravel being much better for this purpose. No additional pumping capacity will be required to secure the water from the new location than is at present used.

Funds Come From Bond Sale. The city has voted over \$400,000 in bonds for water works improvement, and as soon as a recent issue is sold, there will be more than enough funds from which to procure the money needed to build a handsome new station.

Tulsa municipal water works system is one of the most successful in the southwest, and is one of the city's best assets and biggest talking points. The only disagreeable feature about the whole thing at present is that the condition and appearance of the present plant is such that Tulsans are ashamed to show it to visitors.

Good European Doctrine. According to Italian philosophy, a cause for war and a desire for territory mean the same thing.—Louisville Courier-Journal.

## BLUEFEATHER IS A SORRY INDIAN

ONCE HE HAD PLENTY OF MONEY NOW GOES TO JAIL ON VAGRANCY CHARGE.

DEATH ALMOST A RELIEF

Digging in the Ditch, or "Laying Out" a Fine, About the Same Thing to Him—Never Learned Trade.

"I am guilty under the law. I have no employment. The white man has robbed us Indians of our land and many of us, like myself, are penniless; nothing more than common tramps. We always had money during our youthful days, and consequently never learned a trade. Now that everything is gone we are forced to dig in the ditch or spend the majority of our days in jail, which is about the same thing, anyway."

"In the past year and a half I have received a fine in practically every city of importance in Oklahoma—not for any really criminal acts, but simply because I was found loitering about pool halls and such places instead of working. The white man took our wealth from us and is now hounding us to a point where death would almost be a relief from the present conditions."

He Pleads Guilty.

Broad shouldered, dark skinned and with a defiant expression in his deep eyes, Joe Bluefeather, full-blood Osage Indian, who two years ago owned some of the best farming land in Oklahoma, stood before Judge Chauncey Houston in the municipal court yesterday morning, clothed in rags, with a dirty, red bandana handkerchief about his neck, and pleaded guilty to the charge of being a vagrant. The city statutes define a vagrant as one who has no visible means of support, a frequenter of unlawful resorts, or a professional beggar.

The foregoing statement was made by Bluefeather to a reporter after he had been sent to jail in default of payment of a \$5 fine.

Well Known in Oklahoma.

Bluefeather is well known throughout Oklahoma and is a well educated Indian. He is possibly 30 years old and his parents reside on their land near Ardmore. Joe has been arrested before in Tulsa, on either a charge of drunkenness or vagrancy. Heretofore he was always able to pay his fine and keep from going to jail.

## BANK CLEARINGS SHOW A HEALTHY INCREASE

YESTERDAY'S TOTAL REACHED \$145,272, OR THE LARGEST SINCE SEPT. 16.

The steady increase in Tulsa's bank clearings since the first of last August, continues unabated, and from all indications, the present month should exceed all former periods in this respect. Manager Houston, of the Tulsa Clearing House association announced last night that yesterday's clearings amounted to the amazing total of \$145,272, which is the biggest Monday's business with the clearing house since September 6, last. Each day's clearings this month has shown a handsome increase over the previous day, and from the receipts up to the present time it is fair to presume that the November clearings will exceed those of October, which amounted to the grand total of \$2,441,212, or an increase of \$100,000 over the previous month.

The clearings for last week totaled \$619,022, while the previous week's figures were \$463,945. No surer indication of a town's progress or stability is furnished than by the post office and clearing house receipts, and both of these sources in Tulsa are furnishing ample supplies of "boosting" for the world at large.

The comparative clearing house receipts for the past three months follow:

August—\$2,300,486.  
September—\$2,345,354.  
October—\$2,441,212.

COUNTY IS ENRICHED BY ABOUT \$2,500.

First Day's Sale of Delinquent Tax Property Held—Continues Daily Until All Is Disposed of.

The county treasury was enriched by about \$2,500 yesterday as the result of the first day's sale of property on which taxes have been allowed to become delinquent. The sale opened at 9 o'clock yesterday morning under very auspicious circumstances. In all only about thirty lots were sold, all located in Tulsa county. All but one were bought by individual buyers, the one case having been that in which the highest bidder did not reach the amount of delinquent taxes, and this lot was bought in by the county.

Owing to the rush of work in the county treasurer's office the sale lasted about half an hour. It will be continued every day at 9 o'clock until the entire lot of delinquent property has been offered for sale.

How Did He Get Loose Again?

Good heavens, here's a voice denouncing "bureaucratic government," and the voice is Ballinger's!—Boston Transcript.

## COMMERCIAL CLUB TO ARRANGE TRIP TODAY

MEETING OF INTERESTED IN TRADE EXCURSION HELD AT 10 THIS MORNING.

A meeting of persons interested in the Wichita trade excursion to be taken on next Friday by more than a hundred Tulsans, will be held in the Commercial club rooms at 10 o'clock this morning for the purpose of arranging details of the trip and the advertising matter to be used.

It is too late to have uniform caps for the boosters, and some cleverly designed ribbon will probably be gotten up to be worn around the hat, bearing a unique catchy, and significant phrase. Badges will also be worn on the coats.

The thirteen members of the band that will be taken along on the trip will be in full uniform, and it is desired to have the members of the booster party attired in some decoration that will present a good effect when the march is made through Wichita's principal streets and at the stations along the route where stops will be made. Appropriate inscriptions for banners to place along the sides of the coaches in the train will also be decided on at today's meeting.

## NEW ARRANGEMENT FOR CITY USE IN DITCHING.

Two Plows, Three Men and Two Teams Greatly Lower Cost Over Method Formerly in Use.

The city water department has recently put into operation a ditch digging arrangement which saves about half the usual expense of excavating and which is thought to be an entirely original apparatus.

Two plows, two teams of horses and three men make up the system, which was devised by Water Superintendent B. H. Sands. The plan was given its initial try-out last week, when a ditch in which a line to Kendall college is to be laid, and which is eight thousand feet long, was dug in one day's time. The saving over the ordinary pick and shovel process amounted to about

\$100, and as a result, the system will probably be inaugurated all over the city.

An ordinary turning plow starts the operation by turning the top layer of earth along the line of the ditch. Then a sub-soiler plow follows it up, loosening up the earth down to a depth of from 20 to 22 inches. The loose dirt is then shoveled out with great rapidity by men with shovels.

For deeper ditches, it is planned to place a long chain on the sub-soiler and put the plow in the bottom of the ditch, while the horses that furnish the motive power will walk along the outside of the ditch.

It generally costs about 5 cents a foot for excavating these ditches, and the new plan will cut down this price by about half, it is said.

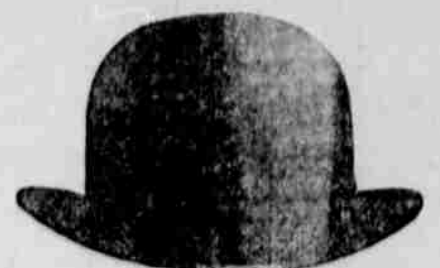

## REV. KENSIT GIVEN EAST TULSA CHARGE

ANNOUNCEMENT MADE BY BISHOP OF QUAYLE OF KEIFER MAN'S SELECTION.

Announcement has been made by Bishop Quayle of the appointment of the Rev. John W. Kensit of Keifer to succeed the Rev. J. C. Magee, who resigned recently as pastor of the East Tulsa Methodist church.

The new pastor is one of the most able pulpits orators in eastern Oklahoma, and is especially adapted to the work of guiding young and growing congregations, as is shown by his excellent record at his recent charge.

The Rev. Kensit was appointed one year ago to take charge of the Methodist church at Keifer, and build an edifice. In spite of the fact that his predecessors had failed to procure a new church edifice, the Rev. Kensit succeeded in doing so, and a substantial building costing \$5,000 now stands as a monument to his energetic labors during the year he was there. On last October 24th the Keifer edifice was dedicated by Bishop Quayle, who said, among other things, that it had been a long time since he had witnessed such quick and aggressive work in building a new church as the Keifer building indicated. The church has a basement and is modern in every respect.

Try an

**"IMPERIAL HAT"**

and you are bound to be suited. You not only settle the Hat question for the season, but you discover a hat which will give good service at all times.

It is absolutely correct in style, comes in 20 different varieties, and costs but \$3.

We know that advertising will bring men in once, but it takes satisfaction to hold them. The "IMPERIAL" satisfies.

CLOTHING CO.  
216 So. Main

The Rev. Kensit expected to remain in Keifer during this conference year, but owing to Dr. Magee's resignation, he was sent here at once.

## Low Rates.

It may surprise people who are wondering why the murderers of the Colorado families and of the Ellsworth family and the Illinois family, and of Dr. Knabe are ever tried and convicted, but that is what the criminal statistics show, and that, perhaps is the reason why there are so many murders.—St. Joseph Gazette.

## Keeps Many Out.

The announcement is made that Ethel Le Neve is to be refused admission to the United States. It is said that she can be kept out on the ground that she is an undesirable citizen because she traveled with Dr. Crippen.

without the preliminary of a marriage ceremony. But if this is to be drawn on Ethel, won't it cause considerable decrease in immigration and also in the return of our own citizens who travel?—Chicago News.

## Severity in This Retort.

"Is there a hell?" asks the Choctaw Herald, published at Hugo, Okla. We should think that the Herald would be in position to give expert testimony on the question in view of the ballot box stuffing and vote stealing it has witnessed since statehood in that county—Springfield, Mass. Republican.

At Dresden there is in the course of construction what is said to be the largest radiator in the world. This radiator is intended for the motor of an airplane of 300-horse power and is made entirely of aluminum.

# We Get a Slap

The big coffee trust, made up of Brazilian growers and American importers, has been trying various tactics to boost the price of Coffee and get more money from the people.

Always the man who is trying to dig extra money out of the public pocket, on a combination, hates the man who blocks the game.

Now comes a plaintive bleat from the "exasperated" ones.

The *Journal of Commerce* lately said: "A stirring circular has just been issued to the coffee trade." The article further says.

"The coffee world is discussing what is to be the future of coffee as a result of the campaign of miseducation carried on by the cereal coffee people. We have before us a letter from one of the largest roasters in the South asking what can be done to counteract the work of the enemies of coffee."

"The matter should have been taken up by the Brazilian Gov't when they were completing their beautiful valorization scheme."

Then the article proceeds to denounce Postum and works into a fine frenzy, because we have published facts regarding the effect of coffee on some people.

The harrowing tale goes on.

"Where a few years ago everybody drank coffee, several cups a day, now we find in every walk in life people who imagine they cannot drink it. (The underscoring is ours.)

Burly blacksmiths, carpenters, laborers and athletes have discontinued or cut down the use of coffee; as there is not a person who reads this and will not be able to find the same conditions existing among his own circle of acquaintances. Is it not well for the Brazilians to sit up and take notice?"

Isn't it curious these "burly" strong men should pick out coffee to "imagine" about? Why not "imagine" that regular doses of whiskey are harmful, or daily slugs of morphine?

If "imagination" makes the caffeine in coffee clog the liver, de-

press the heart and steadily tear down the nervous system, bringing on one or more of the dozens of types of diseases which follow broken-down nervous systems, many people don't know it.

But it remained for the man who has coffee, morphine or whiskey to sell, to have the supreme nerve to say: "You only imagine your disorders. Keep on buying from me."

Let us continue to quote from his article:

"Notwithstanding the enormous increase in population during the past three years, coffee shows an appalling decrease in consumption."

Then follows a tiresome lot of statistics which wind up by showing a decrease of consumption in two years of, in round figures, two hundred million pounds.

Here we see the cause for the attacks on us and the Brazilian sneers at Americans who prefer to use a healthful, homemade breakfast drink and incidentally keep the money in America, rather than

send the millions to Brazil and pay for an article that chemists class among the drugs and not among the foods.

Will the reader please remember we never announce that coffee "hurts all people."

Some persons seem to have excessive vitality enough to use coffee, tobacco and whiskey for years and apparently be none the worse, but the number is small, and when a sensible man or woman finds an article acts harmfully they exercise some degree of intelligence by dropping it.

We quote again from the article: "These figures are paralyzing but correct, being taken from Leech's statistics, recognized as the most reliable."

This is one of the highest compliments ever paid to the level-headed, common sense of Americans who cut off about two hundred million pounds of coffee when they found by actual experiment (in the majority of cases) that the subtle drug caffeine, in coffee,

worked discomfort and varying forms of disease.

Some people haven't the character to stop a habit when they know it is killing them, but it is easy to shift from coffee to Postum for, when made according to directions, it comes to table a cup of beverage, seal brown color, which turns to rich golden brown when cream is added, and the taste is very like the milder grades of Old Gov't Java.

Postum is a veritable food drink and highly nourishing, containing all the parts of wheat carefully prepared to which is added about 10 per cent of New Orleans molasses, and that is absolutely all that Postum is made of.

Thousands of visitors to the pure food factories see the ingredients and how prepared. Every nook and corner is open for every visitor to carefully inspect. Crowds come daily and seem to enjoy it.

**"There's a Reason"**

Postum Cereal Company, Limited  
Battle Creek, Michigan
